Our products	10

The background of the image consists of a repeating pattern of green wire coils. Each coil is a thick bundle of thin wires, tightly packed and held together by small black plastic ties. The coils are arranged in a staggered, grid-like pattern. In the center of each coil, there is a white circular cutout. The overall color scheme is a vibrant green with white accents.

**Since**

**1977**

### Who we are

At the service of the customer with efficiency and quality, Tramev has been proposing itself since 1977 in the wire and derivatives producers market. Among some of them:

- **TRAMEV PORTABLE TOOLS**

for cutting, straightening and bending of metal wire, allowing a fast and effective solution to the problems related to wire, cable, strand, bolts and nuts.

- **TRAMEV PORTABLE PUNCHING TOOLS**

for carpentry and mechanical machining.

- **MACHINE BUILDING**

mechanical workshop equipped for the construction of machines and accessories, such as: unwinders and tilters, drawing lines with throwing monoblock, packing and reels for wire rod and drawn wire. Head welding machines, wire pulling pliers, internal gripping pliers for the management of coils and hanks.

## Human Resources

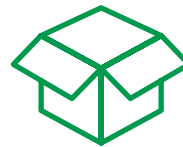

The foundations of a great company rest on a valuable human capital. Each employee of our company is and integral and fundamental part of the system which allows Tramev to be a brand known in the market.

**50+**  
foreign states

**20+**  
agents and distributors

**200+**  
products

**MACHINERY  
AND EQUIPMENT  
FOR THE WIRE  
AND CABLE SECTOR**

## Environment, Health, Safety

Environmental protection has always been a core element of our company's growth. The constant commitment to the preservation of the health and safety of workers and territory has been, is and will always be a core value and a constant commitment for Tramev.

## DESTINATION SECTORS

Wire-drawing Mills

Bolt Mills

Steel Mills

Cable Manufacturers

Spring Factories

Metal Sector

“

A MAN MAY BE AS CAPABLE AS POSSIBLE,  
MAY HAVE A STRONG INTELLIGENCE AND GOODWILL,  
BUT WITHOUT CAPABLE EMPLOYEES  
HE WON'T GO ANYWHERE.

”

President

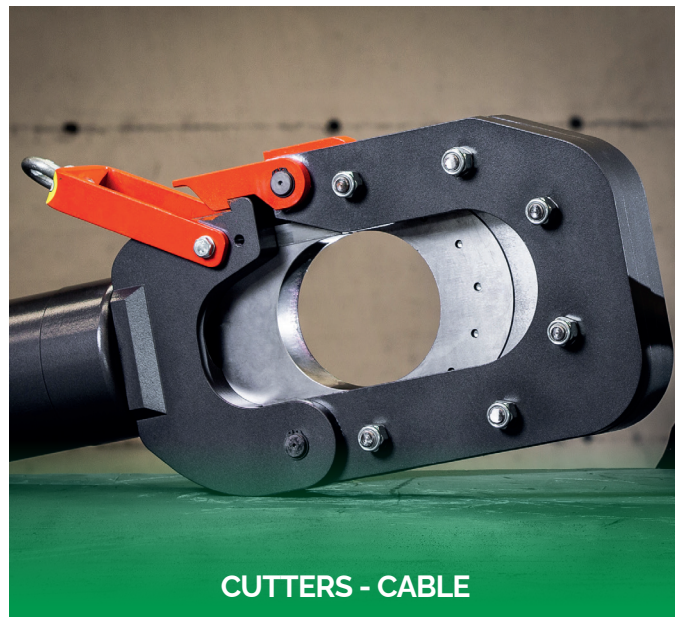

## OUR PRODUCTS

Tramev is leader in the production of machinery and equipment for the metallic wire and cable sector.

The products realised in our Cesana Brianza production unit meet European environmental standards and quality control regulations.

### CUTTERS

The Tramev shears line offers a full range of portable tools for cutting, straightening or bending of metal wire, allowing a fast and effective solution to the problems related to wire, cable, strand, bolts and nuts.

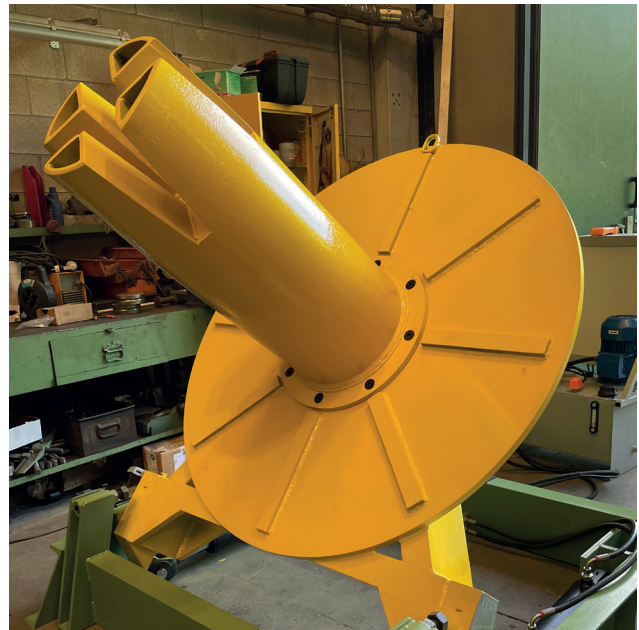

## PUNCHING TOOLS

A complete range of battery, electrical and pump operated punching machines. All the tools are “Double Acting” (DE) for an effective jam-free punch retraction.

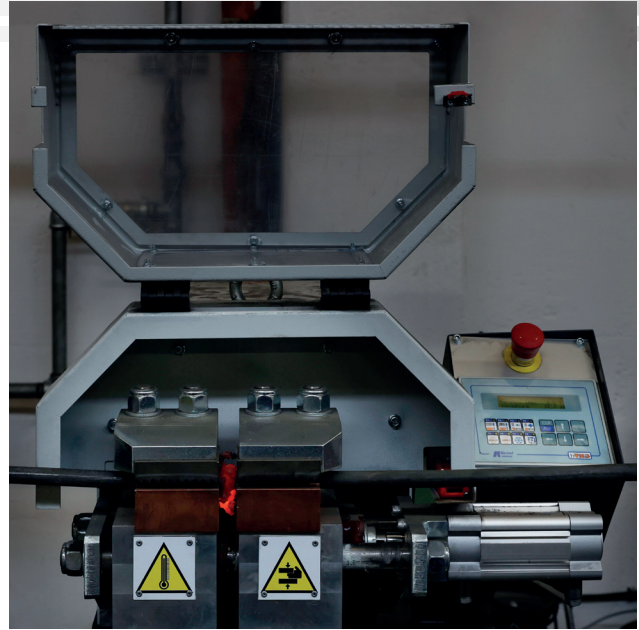

## UNWINDERS, OVERTURNING UNWINDERS

We produce support, rotation and motion devices for coils and carriers for wire rod and drawn wire. We produce both standard and special devices depending on your request, to improve productivity and to rationalize stocking spaces and loading of wire coils.

## HEAD WELDING MACHINE

Full range of manual and automatic head welding machines up to diam. 40 mm.

## EQUIPMENT

We produce wire machinery and customized equipment to cover the specific needs of each customer.

## WIRE-DRAWING LINES, FASTENERS SECTOR

The TRSP machine series is the answer for manufacturers looking to obtain wire with superior mechanical characteristics. Available in seven different models, the new wire skin-pass blocks come in a very compact format and are suitable for processing wire with a diameter ranging from 6 to 35 mm. The TRSP machines are also equipped with safety systems compliant with current regulations and are part of the broader Industry 4.0 initiative.
